Ed:

Could you please review this Evidence and Site Control Agreement prepared by OSHA for the group. This issue is how to preserve evidence and site control so that actions taken by the various agencies do not impact the evidence on the site.

I do not necessarily think that we will be doing any evidence collection activities but may need to collect on-site samples. It appears that TCEQ wants the lead on the cleanup activities on the site should the RP decide not to do such actions. They intend on issuing a demand letter to the owner very soon.

Please review this agreement with our managers and make whatever modifications need to be made to this agreement for us to be a party if we determine that we may take some actions on the site.

Thanks

All,

Attached is a working draft of an evidence and site control agreement for this matter. It is modeled after some others OSHA has used in prior cases, however, we will need to come up with some more precise definitional items, e.g., the exclusion zone in paragraph A.1.a and/or paragraph C.8.a (dealing with steps for evidence collection removal steps that are specific to this situation). Please look it over

and let me know what changes, additions, etc.
everyone would like to see. I will compile
those into one agreement and send out for
everyone's approval. Thanks...

Jack Rector
